Overview > movies

New Document Security... Compact & Cleanup... Delete Database...

Jump to: Document ID

View: Temporary view... State views

View Code

Map Function:

```
function(doc){
  emit(doc.title, doc.director)
}
```

Reduce Function (optional):

Run Language: Revert Save As... Save

Warning: Please note that temporary views are not suitable for use in production, as they are really slow for any database with more than a few dozen documents. You can use a temporary view to experiment with view functions, but switch to a permanent view before using them in an application.

Key	Value
"Unforgiven" ID: 91631ba78716bd22e76ac34d8000747	{last_name: "Eastwood", first_name: "Clint", birth_date: "1938"}
"The Social network" ID: bd72713996dd793a7ac767ba90042e	{last_name: "Fincher", first_name: "David", birth_date: "1963"}
